

PermaSeal Standard

Class 3 ADR Item U.N. 1993

TRANSPORT EMERGENCY CARD

ISSUE 1.1

12 MAY 2008

CARGO

Flammable liquids having a flashpoint between 23°C and 61°C.
Named: Permaseal UN N° 1993 Trem Card 30G35.

Colourless liquid usually with perceptible odour.
Immiscible or partly immiscible with water.
Lighter than water.

NATURE OF HAZARD

Flammable.
Slightly Corrosive.
May evaporate quickly.
Slightly toxic.
The vapour is invisible, heavier than air and spreads along the ground.
May form explosive mixture with air particularly in empty uncleaned receptacles. Heating will cause pressure rise with risk of bursting and subsequent explosion.
May have irritant effect on eyes, skin and respiratory tracts.
Decomposes in a fire giving off toxic fumes.
The effect of inhalation may be delayed.

PROTECTIVE DEVICES

Suitable respiratory protective device.
Goggles giving complete protection to eyes.
Plastic or synthetic rubber gloves.

EMERGENCY ACTION - NOTIFY POLICE & FIRE BRIGADE

Stop the vehicle engine.
No naked flames/lights. No smoking.
Put on protective equipment before entering danger area.
Mark roads and warn other road users.
Keep public away from danger area.
Stay upwind of the spillage.

SPILLAGE: Shut off leaks if without risk.
Prevent liquid entering sewers, basements and work pits - vapour may create an explosive atmosphere. Absorb or contain leaking liquid with sand or earth or other suitable material. Consult an expert.
If substance has entered a watercourse or sewer or has contaminated soil or vegetation, advise the police.

FIRE: Keep container(s) cool by spraying with water if exposed to fire.
Extinguish with dry chemical, foam or waterspray.
DO NOT use water jet.

FIRST AID: If substance has got into the eyes, immediately wash out with plenty of water.
Continue treatment until medical attention is provided.
Remove soaked clothing immediately, wash affected skin with soap and water.
Seek medical treatment when anyone has symptoms apparently due to inhalation or contact with eyes.
Persons who have inhaled the fumes produced in a fire may not show immediate symptoms. Patients must be kept under medical supervision for at least 24hrs.
In case of burns, immediately cool affected skin as long as possible with cold water.
